

Spacer wheels are a simple and secure way to support reo bars and mesh to provide the required concrete cover. ConForce polyethylene spacers are easy to fit. They securely clip onto the steel bars and stay in place when vibrated.

ConForce spacer wheels are an economical way to ensure steel remains in the correct position.

ConForce spacer wheels are available to provide from 15mm to 40mm concrete cover for bars up to 12mm diameter.

SPACER WHEELS

| Description | Model Number | Concrete Cover | Carton Quantity | Carton | | Bag 100 Wheels | |
|-------------------|--------------|----------------|-----------------|--------|--------|----------------|-----|
| | | | | Piece | Carton | Piece | Bag |
| 15mm radius wheel | 4-12/15 | 15mm | 4000 | | | | |
| 20mm radius wheel | 4-12/20 | 20mm | 2500 | | | | |
| 25mm radius wheel | 4-12/25 | 25mm | 2500 | | | | |
| 30mm radius wheel | 4-12/30 | 30mm | 1500 | | | | |
| 40mm radius wheel | 4-12/40 | 40mm | 500 | | | | |
